

Ultimate picture clarity

Tesla TVs make movies, TV programs, games and online content look even better. With a crystal-clear picture, superior sound, modern design, Tesla TVs provide quality that is a class above its price and a good reason to get together time and time again. Our models use leading technology and deliver an outstanding level of performance.

Outstanding Dolby sound

Tesla webOS TVs boast amazing sound, but the Music player app elevates the experience of listening to favourite songs, podcasts and much more to a whole other level. It allows customers to play music through their TVs, even when the TV screen is off, so not just a TV.

Powered by WebOS

WebOS is an intelligent TV operating system based on LINUX, created to provide a great audio-visual experience while supporting TV broadcasting systems. It supports Dolby audio, HDR, HLG, as well as world's top content apps. With a feature called "Home dashboard", users can easily manage all inputs, settings and connected devices.
